ASE in WURI 2026

ASE is present among the innovative universities recognized worldwide: ranked 229th in the World University Rankings for Innovation - WURI 2026

ASE remains present in the World University Rankings for Innovation (WURI) 2026, ranked 229th overall and included, for the sixth consecutive year, among the Global Top 500 Innovative Universities.

The WURI ranking released on May 7, 2026, highlights universities that generate real impact in society and the economy, evaluating the capacity of higher education institutions to develop innovative, relevant and applied projects. The methodology takes into account criteria such as the innovativeness, implementability and impact - the actual contribution of universities to the economic and social environment.

The result obtained by ASE confirms the consistency of an institutional strategy oriented towards innovation, internationalization and the permanent adaptation of the educational and research process to the dynamics of the global economy and contemporary society.

The constant presence of ASE in international academic rankings reflects the consolidation of the University's profile as a reference institution in the fields of economic sciences and public administration, both at the national and international levels.
